

Dear Middle School Parents,

The middle school students have been great this week. They have solved over 2,500 math problems and had hundreds of comments, suggestions and questions!

Tomorrow the middle school students will all be going on a Virtual Field trip to a Pharmaceutical (Medicine) company hosted by Discovery Education. They will learn some of the steps how a new medicine is developed and brought to an approved form for human use. There is a 24 minute (non-YouTube) video that they may review as much as needed to answer the quiz required for this assignment.

There is no new math homework for tomorrow. Only to ask them to catch up on previously assigned lessons. I will be working to send out a missing assignment report by tomorrow or perhaps Monday for your student.

Announcements

The 6th Grade Students will have the due date for the element slide project extended until Wednesday 4/29. I have not heard back from all the students on their element choice for the project.

We will try again on Friday Tomorrow at 10 am to discuss the 7/8th grade science research and to play Quizlet. I have sent a Zoom mtg invitation to the students e-mail and posted the invitation on the Google Classroom.

As always, please let me know if you have any questions.

Stay well and God Bless.

Mr. Anderson
