

Dear Middle School Parents,

All the 6-8<sup>th</sup> grade students have the Prodigy Middle School math hour for their math assignment tomorrow. If they can't make it at 10-11am tomorrow when the other students are competing, then please ask them to work on Prodigy math for at least 45 minutes before Monday.

Tomorrow, the 6-8<sup>th</sup> grade students have a virtual science electricity experiment assignment using the University of Colorado PhET simulations lab. The instructions are on Google Classroom. I will help any students struggling either on Google messaging, e-mail or during the Zoom virtual office hours Friday at 10:30 am. Please let me know if your student is having any difficulty with the virtual experiments. If the virtual experiments are successful, we will have additional ones next week 😊

Remember, my teacher office hours will be on Zoom on Monday, Wednesday and Friday at 10:30-11:30. Any student that needs help with any question in math and science is welcome. The Zoom link is posted on Google Classroom.

As always please let me know if you have any questions or suggestions.

Stay well and God Bless.

Mr. Anderson
